Subject: Overtime Rules

Chris,

I got this from one of the OSCs. I usually take comp time and not OT so don't really understand all the rules. Plus, tonight with Ronnie/Carl, I thought someone said the Gold King Mine Spill had no cap?

- 1) Per message below, do you have my individual amount of OT hours per pay period I can take before hitting cap?
- 2) Is there a cap or not on Gold King Mine Spill?
- 3) I will probably take comp hrs also - FYI

Thanks

First: whether it's comp or OT, it adds up against the cap. So if you put in for 25 hours of OT you might only get paid for 23. Or if you put in the same 24 of comp, you will only see 23 comp hours. Any combination figures the same way.

Chris Petersen does have a list of what individuals can get before they hit the cap. Yours is probably around 20 hrs per pay period. But it could be 18 or 25.

And phone duty pay does count against it.
